-----------------------------------	---

Welcome to CorpDoc

CorpDoc turns plain Markdown into professional corporate PDFs with zero manual layout work. This document demonstrates every feature.

What CorpDoc does

- Extracts **brand colors** automatically from your SVG logo
 - Generates a branded **cover page** with title and subtitle
 - Adds a **version history** page for document control
 - Builds an **automatic table of contents**
 - Renders **headers and footers** on every page with your company info
 - Formats **tables** with zebra striping in your brand colors
 - Supports **nested lists** with proper indentation
 - Handles **Mermaid diagrams** as styled blocks
 - Detects the **document language** automatically
-

1. Text Formatting

CorpDoc supports inline markdown: **bold text**, *italic text*, ***bold italic***, and `inline code`. Paragraphs are justified and use a professional serif-free font stack for readability.

1.1 Bullet Lists

Simple bullet lists:

- First item
- Second item
- Third item

Nested lists (use 2-space indent for sub-items):

- **Phase 1: Planning**
 - Requirements gathering
 - Stakeholder interviews
 - Initial design mockups
- **Phase 2: Development**

- Backend implementation
- Frontend integration
- Automated testing
- **Phase 3: Deployment**
 - Staging rollout
 - Production deployment
 - Post-launch monitoring

1.2 Headings Hierarchy

The document supports four heading levels (H1 through H4), each styled in the brand colors with appropriate spacing.

This is an H3

Used for sub-sections within a main chapter.

This is an H4

Used for fine-grained subdivisions.

2. Tables

Tables are automatically styled with brand colors. The header row uses the primary color, and even rows get a subtle tint of the accent color.

2.1 Simple Table

Feature	Status	Priority
Cover page	✓ Done	High
Version history	✓ Done	High
Auto TOC	✓ Done	High
Nested lists	✓ Done	Medium
Mermaid diagrams	Partial	Medium
Multi-language	✓ Done	Low

2.2 Wider Table (6+ columns)

Phase	Duration	Team	Budget	Status	Risk
Planning	2 weeks	3	€5,000	Done	Low
Design	3 weeks	5	€12,000	Done	Medium
Development	8 weeks	8	€45,000	In Progress	Medium
Testing	2 weeks	4	€8,000	Pending	Low
Deployment	1 week	2	€3,000	Pending	High

2.3 Very Wide Table — Auto Landscape

When a table has 8 or more columns, CorpDoc automatically rotates the page to landscape so the content stays readable. The threshold is configurable via `tables.landscape_threshold` in the YAML.

Phase	Duration	Team	Personnel	Materials	Software	Travel	Overhead	Total
Planning	2 weeks	3	€4,200	€150	€0	€300	€350	€5,000
Design	3 weeks	5	€9,800	€600	€900	€0	€700	€12,000
Development	8 weeks	8	€36,000	€1,100	€4,200	€800	€2,900	€45,000
Integration	2 weeks	6	€7,400	€300	€0	€0	€800	€8,500
Testing	2 weeks	4	€6,500	€200	€700	€100	€500	€8,000
Deployment	1 week	2	€2,400	€100	€200	€100	€200	€3,000
Training	1 week	3	€3,100	€250	€0	€400	€250	€4,000
Handover	1 week	2	€1,800	€0	€0	€0	€200	€2,000

3. Diagrams

Mermaid diagrams are rendered as styled information blocks in the brand colors. (Full Mermaid rendering requires the Quarto pipeline, which is on the roadmap.)

```
[ Diagram ]

flowchart LR
  MD[Markdown Input]
  Logo[SVG Logo]
  Config[YAML Config]

  MD --> CorpDoc
  Logo --> CorpDoc
  Config --> CorpDoc

  CorpDoc --> PDF[Professional PDF]
```

4. How It Works

CorpDoc is a small, focused Python package. The pipeline is intentionally simple:

- Read the Markdown input file
- Parse YAML frontmatter and body blocks
- Extract brand colors from the SVG logo
- Generate the cover page with accent color block
- Render the version history page
- Build the automatic table of contents
- Emit the body content with styled elements
- Apply header and footer to every content page
- Write the final PDF

5. Configuration

All branding is defined in a single `corpdoc.yml` file. Once set up, the same configuration can be reused for every document your company produces.

The config controls the company name, tagline, logo paths, footer fields, and typography defaults. The color palette is derived automatically from the logo.

6. Next Steps

Visit github.com/RoCCoCo13/corpdoc for the full documentation, more examples, and installation instructions.

Contributions are welcome!
